

pathoZoom® diagnosticAssistant

smart in media
the pathologists' company

PathoZoom® Diagnostic Assistant takes care of repetitive routine tasks for you, such as quantifying tumor cells. The result: you save time and can concentrate on the tasks where your human expertise and experiences are indispensable.

Here are the features at a glance:

EASY TO USE

- Diagnose with third-party AI applications
- Use Mindpeaks's already integrated AI for breast cancer (Ki67, ER, PR, HER2/neu) and lung cancer (PD-L1)
- Activate the AI function with a single button click, select the area to be analyzed and get the result within seconds

SECURE AND ACCURATE

- Thanks to the most precise settings, you can always determine the threshold values for e.g. positive tumor cells yourself
- The evaluation of each cell is visually displayed in detail, so that you can see at a glance how the AI evaluates

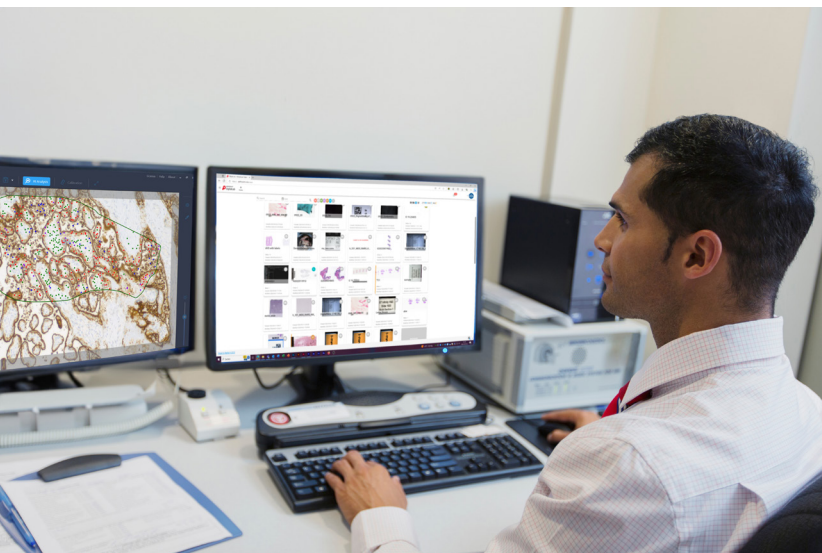

YOUR BENEFITS

SPEED

- Never count cells by hand again
- Get your results in just a few seconds

FLEXIBILITY

- Any newly developed AI can be integrated into the PathoZoom® solutions without problems
- Always choose the area which you want to analyze yourself and how you want to count cells as positive / negative (threshold)
