

# pathoZoom® liveView Macro

smart in media  
the pathologists' company

**PathoZoom® LiveView Macro** transforms your grossing station and frozen section site with high-resolution photos, videos, and live broadcasts to colleagues. Automatically link macro images to cases, keeping all medical images in one place for a comprehensive case overview, enhanced diagnostics, and a more efficient workflow.

## YOUR BENEFITS

### Macroscopy in Clear Images – Precision at Your Fingertips Images – Capture & Share with Ease

- Capture high-resolution images of tissue samples with a single touch and share them alongside histological slides
- Store securely—save images locally in JPEG, PNG, BMP, or TIFF formats, or upload them into the PathoZoom® SlideCloud
- Focus on what matters—save the entire image or just the zoomed-in region for detailed analysis

### Videos – Real-Time Streaming & Documentation

- Stream live from the grossing station to any web-enabled device (PC, tablet, smartphone)
- High-quality streaming delivers crystal-clear images without straining your lab network
- Save video recordings of your work directly to your computer or upload and share them instantly via QR code or link
- Communicate in real-time with an integrated audio connection link to Microsoft Teams, Zoom, and other platforms

### COLLABORATE SEAMLESSLY

- Real-time collaboration – surgeons interact directly from the OR
- Remote guidance – support young colleagues at the grossing station
- Interactive drawing tools – viewers can mark directly on the streamed video

### SET UP & START IN MINUTES

- Mount a camera over your grossing station and install PathoZoom® LiveView Macro—that's it!

# Macroscopy Made Easy: See more, diagnose better

## SIMPLE TO USE

### Interactive Features – More Insights, More Precision

- Annotate images – mark, count, or highlight key areas
- Perform digital length and area measurements with just a few clicks after camera calibration
- Place multiple measurements at once for a detailed analysis
- Add text directly into images to simplify communication with colleagues

The Measurement Tool of PathoZoom® LiveView Macro complies with the requirements of the IVDR and is marked with the CE label
