

pathoZoom® Scan & liveView

smart in media
the pathologists' company

With the world-leading system **PathoZoom® Scan & LiveView**, you can digitize your microscope in just minutes – opening the door to modern, collaborative diagnostics. Stream your slides in seconds for live discussions, add annotations and measurements, or share your scans effortlessly via link or QR code – all without expensive specialized hardware.

Your Microscope Goes Digital – Fast and Easy

- Upgrade your microscope with a camera, install our software – and you're ready to work digitally
- Enjoy both powerful modes of our future-proof solution: Scan and LiveView, designed to simplify and enhance your diagnostic workflow

Seamless Collaboration – In Real Time and Worldwide

- Share your live microscope view for instant second opinions, tumor boards, or collaborative discussions
- Stream your microscope feed to any device with a web browser – PC, laptop, tablet, or smartphone
- Send time-saving QR codes or links to your personal stream via email or messaging
- Add a meeting link for live voice or video discussion with colleagues
- Broadcast your live view to up to 100 viewers – no registration needed to watch
- Highlight key areas together using the Whiteboard feature during live streams
- Benefit from our specialized streaming technology that delivers high-quality still images without compression artifacts when the microscope is idle

YOUR BENEFITS

SPEED

- Share slides digitally instead of shipping physical glass slides
- Efficient case presentation at tumor boards and conferences

QUALITY

- Scan results on par with professional-grade microscope scanners

SERVICE

- Regular, automatic software updates
- Free support hotline

AI-READY

- Easy integration of AI tools, e.g. for counting tumor cells

FLEXIBLE ENTRY

- Cost-effective solution for gradually transitioning into Digital Pathology

UPGRADE: Turn Your Microscope Digital with Scan & LiveView

EASY & FAST

LiveView – Precision and Efficiency at a Glance

- View your sample on your computer screen and measure lengths or areas at any magnification
- Annotate your slides with various tools and save them as screenshots for better collaboration
- Record videos directly within the software and share them with colleagues or attach them to patient cases

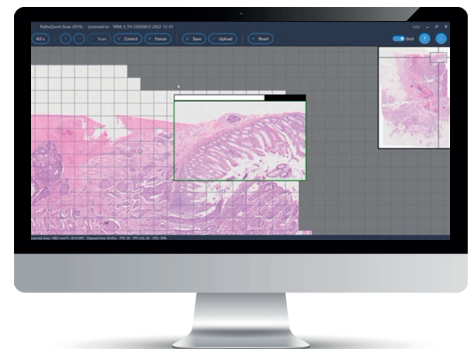

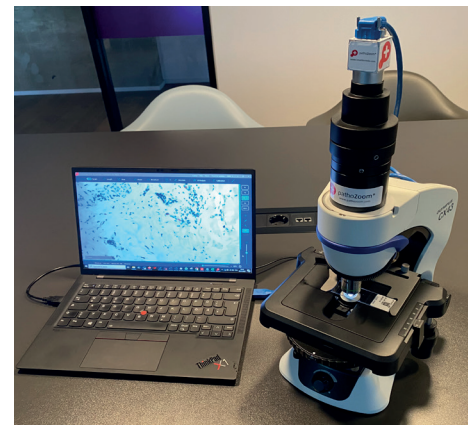

Scan – Faster Than Traditional Microscope Scanners

- Scan your slides quickly and in stunning quality – comparable to high-end scanners
- Select what you want to scan: the entire slide, only relevant areas, or a combination of magnifications in a single file
- Store scans locally or in the PathoZoom® SlideCloud, and share them easily via link or QR code – no login required for viewers

Artificial Intelligence – Integrated into Your Workflow

- Use third-party AI models directly within LiveView
- Define the region to be analyzed and get results within seconds, complete with detailed metrics
- Export your results and share them via the PathoZoom® SlideCloud

The Measurement Tool of PathoZoom® Scan & LiveView complies with the requirements of the IVDR and is marked with the CE label.
