

pathoZoom®  
slideCloud

smart in media  
the pathologists' company

**PathoZoom® SlideCloud** is the one cloud solution you need to upload and share digital whole slide images and macro images from the grossing station, either from your internet browser or directly from other PathoZoom® products. Attach measurements and annotations to give colleagues a quick overview and precise questions. Implement images from the SlideCloud directly into your website via an iFrame, and choose the plan with the right amount of storage space that is right for you.

### Store and View Images in the Best Quality

- Upload images of whole scanned slides, regions of importance or macro images from the grossing station without compression
- View images in any browser with quick and reactive controls on your PC/Mac, tablet or smartphone
- Use other PathoZoom® products to upload images directly from there and include image data, description and annotations and measurements from the program
- Share images with a link or QR code - no registration is required to view them
- Integrate images from the SlideCloud on your website or use it with SmartZoom® Classroom to create a modern e-learning platform

## YOUR BENEFITS

### SPEED

- Faster second opinions, no transport of glass slides
- Upload directly from your PathoZoom® software without complicated log-in processes

### UNLIMITED SUPPORT

- Professional service for optimum performance and efficiency
- 98.5% guaranteed server availability through the use of redundant systems
