

pathoZoom® liveView

smart in media
the pathologists' company

With PathoZoom® LiveView as part of the worldwide leading system PathoZoom® Scan & LiveView, you can bring your microscope into the world of Digital Pathology. Stream your view of the specimen to colleagues in mere seconds to discuss and diagnose cases together.

Your Microscope Goes Digital – Fast and Easy

- Upgrade your microscope with a camera, install our software – and you're ready to work digitally

Seamless Collaboration – In Real Time and Worldwide

- Share your live microscope view for instant second opinions, tumor boards, or collaborative discussions
- Stream your microscope feed to any device with a web browser – PC, laptop, tablet, or smartphone
- Send time-saving QR codes or links to your personal stream via email or messaging
- Add a meeting link for live voice or video discussion with colleagues
- Broadcast your live view to up to 100 viewers – no registration needed to watch
- Highlight key areas together using the Whiteboard feature during live streams
- Benefit from our specialized streaming technology that delivers high-quality still images without compression artifacts when the microscope is idle

YOUR BENEFITS

SPEED

- Share slides digitally instead of shipping physical glass slides
- Efficient case presentation at tumor boards and conferences

QUALITY

- Visual results on par with professional-grade microscope scanners

SERVICE

- Regular, automatic software updates
- Free support hotline

AI READY

- Integrated AI tools to e.g. count tumor cells or classify cells in a bone marrow smear

FLEXIBLE ENTRY

- Cost-effective solution for gradually transitioning into Digital Pathology

CONNECTED: With LiveView communication is easy

EASY & FAST

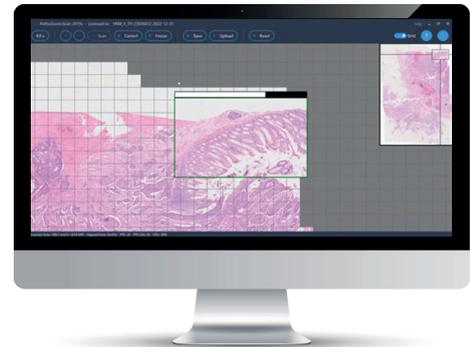

LiveView – Precision and Efficiency at a Glance

- View your sample on your computer screen and measure lengths or areas at any magnification
- Annotate your slides with various tools and save them as screenshots for better collaboration
- Save multiple images of specimens directly into a case, including measurements and annotations, using the Case Manager
- Record videos directly within the software and share them with colleagues or attach them to patient cases

Artificial Intelligence – Integrated into Your Workflow

- Use third-party AI models directly in LiveView, select a region to analyze, and receive the results with detailed figures in seconds
- Export your results and share them via the PathoZoom® SlideCloud

The Measurement Tool of PathoZoom® Scan & LiveView complies with the requirements of the IVDR and is marked with the CE label.
