

pathoZoom® Scan

smart in media
the pathologists' company

With **PathoZoom® Scan** as a part of the leading system **PathoZoom® Scan & LiveView**, you can bring your microscope into the world of Digital Pathology. Scan specimens in under just one minute manually using your own microscope, upload them and send them to your colleagues all over the world via link or QR-code.

YOUR BENEFITS

Your Microscope Goes Digital – Fast and Easy

- Upgrade your microscope with a camera, install our software – and you're ready to work digitally

Scan – Faster Than Traditional Microscope Scanners

- Scan your slides quickly and in stunning quality – comparable to high-end scanners
- Select what you want to scan: the entire slide, only relevant areas, or a combination of magnifications in a single file
- Store scans locally or in the PathoZoom® SlideCloud, and share them easily via link or QR code – no login required for viewers
- Trust the fully automatic image correction systems, ensuring high-quality images

SPEED

- Scan complete slides within seconds, just by moving the microscope stage
- Upload of the scanned specimen also takes just a few seconds

QUALITY

- Get the same quality scans like you would using an expensive microscope scanner

SERVICE

- Regular, automatic software updates
- Free support hotline

FLEXIBLE ENTRY

- Cost-effective solution for gradually transitioning into Digital Pathology

CONVENIENT: With Scan your Microscope becomes a Scanner

EASY & FAST

PathoZoom® Slide Cloud – The Secure Solution

- Store and share your scans with the included PathoZoom® Slide Cloud
- Annotate and measure the uploaded scans and share all of this with colleagues via link or QR code
- Add tags to your scans to classify them and make them easier to find

The Measurement Tool of PathoZoom® Scan complies with the requirements of the IVDR and is marked with the CE label.
